

fibervia

fiber-rich snacks for your health

Why discard the healthiest ingredients of fruits, vegetables and oily seeds, left over from juice/oil pressing? Our technology enables to upcycle these dietary fibers. This is how the tasty FiberVia is manufactured.

Dietary fibers may prevent or mitigate **CONSTIPATION**, **obesity**, **HIGH LDL-CHOLESTEROL LEVELS**, **heartburn**, some colon diseases, fluctuating blood sugar levels, **pre-diabetes** and support the *gut microbiome*.

The European population consumes only 50% of the recommended daily intake of dietary fibers which is 30-40 g. One package of FiberVia covers about half of your daily needs.

Feeling good starts inside
